

## BUILDING: **Design Intelligence, LLC Building**

### **LOCATION**

Rexburg, Idaho

### **DESCRIPTION**

This building was designed to reflect the style and type of work that Design Intelligence, llc has become noted for. That is rustic, heavy timber and log in a natural forest setting. Exterior wood siding with rock wainscot and a timber truss are common elements of many recreational homes. This building houses a spacious waiting area with cedar wainscot and an interior vestibule with a glass roof. The office of the principle takes up the front right wing and the conference room with cedar conference table takes up the front left wing. The rear half of the building has three hard wall offices for design manager and engineering professionals and an eight seat open work area for drafting personnel. The office is decorated in a pale green paint with clear coat wood doors and accents creating a warm and comfortable work environment.
