

## BUILDING: **Wallace Addition and Remodel**

### BEFORE

### AFTER

#### LOCATION

Island Park, Idaho

#### DESCRIPTION

The original building was roughly 24x40 or 960 sf. and was too small for family get-togethers. This along with its aged and unappealing exterior motivated the owner to hire us to design what you see in the second picture. Because the building was on the waters edge it was necessary to grow the building upward and toward the east property line. The completed building incorporates turrets, dormers and decks making the exterior look extremely attractive.

#### SERVICES PROVIDED

- › Preparation of Architectural drawings
- › Preparation of Structural drawings
- › Structural Engineering
- › Site Plan

#### SQUARE FOOTAGE

1300 sf Main Floor with 560 sf of deck, 1716 sf Second Floor with 237 sf of deck
